SCUFF PADS FOR FAST, CONSISTENT CUT

SCUFF SPONGE – TWO PADS IN ONE

SCUFF DISCS FOR DA SANDERS

Fibratex Scuff Pads, Sponge and Discs

Features

- Non-woven nylon, low density product impregnated with abrasive grain
- Products are coated evenly with abrasive grain

Benefits

- Excellent conformability to irregular surfaces
- Consistent coverage of grain throughout pad

Green

A medium abrasive for general clean-up, rust removal, adhesive removal and scuffing door jams.

Maroon

A very fine (240 - 360) aluminum oxide abrasive for general cleaning and finishing, and lightly sanding old paint or new primers.

Clear

A very fine (240 - 360) aluminum oxide abrasive for general cleaning and finishing, and lightly sanding old paint or new primers with no color transfer.

Gray

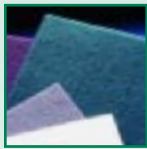

An ultra fine (1000) silicon carbide abrasive for lightly sanding primers or scuffing to blend clearcoats.

White

For general clean-up, light primer rub down and paint overspray removal. Non-abrasive.

Scuff Pads

The Fibratex line of non-woven scuff pads provide a fast, consistent cut and can be used wet or dry. Made of a high loft nylon web design, Fibratex scuff pads can be re-used and last longer than competitive pads.

Scuff Sponge

This combination ultra fine gray/very fine maroon scuff sponge works fast, is easy to handle and can be used wet or dry. Two pads on one sponge gets the job done faster than any single-sided sponge.

Scuff Discs

Use Fibratex scuff discs on a 6" D/A sander using Grip-On back-up pad 055395-29416 to speed up clean-up jobs, primer or clearcoat sanding, and scuffing for 2 to 3 times increase in productivity versus hand scuffing.
